Case: Ecofin Corporate

## AN INNOVATIVE ECOFIN CLOUD INITIATIVE

ABOUT ECOFIN CLOUD:

It's a company dedicated to the development and commercialization of its own management systems business, in particular an ERP and a CRM that can be used for any company, whether in SaaS or On-Premise mode.

THE PROBLEM

We found out that we had a small team with sufficient capacity and knowledge to create a new solution in the market, our biggest problem was the development period, since this task would require the dedication of a long time until you have a stable product that could finally be commercialized

THE SOLUTION

The main objective of this project was, with a small team, to develop an ERP solution from scratch.

RESULTS

Thanks to Scriptcase we were able to carry out the project in less time, the different tools and functionalities that it incorporates makes everything easier for us, besides, we're able to manage the group work in a more efficient way, compared to other tools available in the market

50%
We save 50% on developer maintenance during project creation.

1 Month
The curve of learning is very exponential, in a few days you can start a project, in a few weeks you start to be more efficient and in just over a month you get incredible results!

3x
Scriptcase allowed us to be more efficient in our projects development than other technologies, with SC we were able to increase the efficiency by 3x in certain situations within the development process.

50%
Of the increase speed of development and delivery of results at each stage.
